

Weber Wins In Georgia !

15 Year Old "Flying Farmer" Takes Victory In ProTruck Feature At Lanier Speedway
 Lanier, GA --

Karl Weber won his first stock car race by taking the checkered flag at the 5th Annual "Ice Cold Shriners Bowl" at the 3/8 Mile Lanier Speedway in Georgia. Weber was fastest in second practice for the Saturday Night Feature Truck 20 lap event. The truck race served as a warm-up to the Pro-All Star Series in which Weber will race beginning in April.

"I am thrilled with this Victory" said Weber, "because we have all worked hard to develop my racecraft and it is starting to work for me."

Weber said, "The race started and one guy got around me but I didn't think, I just drove the truck."

After 15 laps, Weber was in second position and chasing. He says, "I could go inside on the corners and the truck felt loose but Tony said to drive it and I did. Finally, I just nudged him and got him loose and drove by. Felt good !"

Manager Blanchard Pleased

Comments & Quotes From Karl Weber's Coach & Team Manager

After a year of practice and learning it all came together at Lanier where he showed great maturity in taking all of the elements of racing and setting-up the driver in front of him and moving him just enough to pass and take his first stock car victory. Karl used all areas of his ability to win the race and he drove smart.

He practiced well on Friday and got faster and faster and eventually took pole. I told him that 'this is your race to win' and, like a champion, he took it to heart and did it! He arced his corners and took care of his tires when he had to and simply drove a smart, but aggressive, race.

Working Ground

Between Schoolwork & Racing Farm Comes First

Karl Weber is a Teen Farmer First. Only schoolwork finishes ahead of racing unless you are talking about getting 11,000-acres ready for planting and then he is all business in Ambia, Indiana. "I work ground for the days between schoolwork and racing driving the John Deere 9430", says Weber. Farms make their money as much at the beginning as at the end." Does he think about racing while in the cab of the 9430? The Flying Farmer says, "I think about it a few times, mostly about the upcoming race but I concentrate on the tractor all of the time."
